

Benefits:

- Our Document Management Solution can be installed and deployed rapidly, minimizing the drain on your IT resources.
- Our System is a thin-client based standard web interface.
- No third-party tools needed. Our System includes:
 - Scanning interface
 - OCR engine
 - Full-text search engine
- Open architecture system and Compatible with:
 - Any TWAIN-compliant or ISIS-driven scanner.
 - Any storage-RAID, NAS/SAN and magneto/optical storage.
 - OS Platform independent.
- Our system integrates with major DB applications- Oracle, Microsoft SQL/Access, and DB2/AS400.
- Our solution provides complete policy based security for individual users and groups.

Partners:

Aspect Document Management solution partners are best in the industry.

- Para-Docs
- Fujitsu
- Ricoh
- Dell
- Other Major Vendors.

Our document management solution is a complete application. It integrates scanning, capture and imaging, markup and revision, recognition, profiling and indexing, versioning, workflow, storage and retrieval, records management, archiving, electronics reports management, security and publishing into a single program.

Services:

Document Management Solution: Our solutions includes complete implementation and support based on your document management requirements. A Document Management solution has to have several components in place in order to effectively function as a Document Management System. We offer services to address every issue and component involved.

Outsourced Services: Aspect Solutions can be used to augment existing capacity within an organization or provide the complete outsourcing of the Document management requirement. Whatever the need may be, whether its image capture, data capture or file conversion services, Aspect will work with the client to determine how we can assist them with their outsourcing needs,

ELECTRONIC DOCUMENT MANAGEMENT/IMAGING
